TAKING THE PAIN OUT OF PAINTING

Stephanie Timotheou

AS the days get warmer and nights get longer, now is the time to consider a fresh paint job to the inside of your home.

Ahmad Haidari, who runs Star Painters Adelaide, says for those wanting a professional job done, finding the right person is key.

"Ask if they have references and make sure you check their past work," he says.

The 25-year-old Afghan Australian has been in the field for seven years and says a paint job should last between 10 and 12 years if done correctly.

"It's not something you need to do all the time ... two coats of quality paint will cover the surface better without streaks and last much longer."

Ahmad adds that he has seen a range of trends since

AHMAD'S TIPS:

- Avoid painting in extremely hot or cold conditions. Spring is the ideal season.

- Allow enough time between coats - 24 hours will allow it to completely dry.

- Before you begin, make sure the surface is prepped to ensure the paint sticks.

he began painting, but one that never outdates is the colour white.

"Whisper white, off-white, antique white and other variations can make a room look bigger than what it is 80 per cent of the time," Ahmad says.

"We are also seeing lots of customers opt for feature walls in larger rooms."

While painting can be done across all seasons inside the home, Ahmad rec-

ommends carrying out the job in warmer months.

"It's not the best time to paint in winter because the paint doesn't dry properly, you can't leave the windows open if it's raining and if you're using oil-based paint, it tends to smell more."

He and his team of eight painters have been servicing the metropolitan and wider South Australian areas for the past three years after moving the business from Sydney.

Despite getting his hands dirty day in, day out, Ahmad says he loves his job because of the interaction he has with customers.

"Our customers are priority and we guarantee the lowest price when comparing ourselves to other reputable companies."
